

CHORI Analysis & Technology Service (Suzhou)Co.,Ltd.

Business

Chemical Analysis

- Analyzing Chinese manufacturer's products
- Substitute incoming inspection for customers

Process Improvement

- Custom synthesis on lab scale
- Engineering guidance for manufacturers

Guidance for manufacturer

- Interested party's audit about ISO Standard(QMS,EMS,OHSMS,FSMS)
- ISO standard consulting

Location

B2-603, Bio Bay , Suzhou Industrial Park

Features

- An analysis center established by a trading company
- Japanese-style Quality Control system
- Keep confidential specification
- Assist from sample arrangement
- Analyze according to customers' requested standard
- QC manager is a Japanese certified measurer
- Ensure certain traceability
- Guidance and training service for manufacturers by Professional Engineer

You can get secure quality products.
We analyze the pre-shipment samples in your behalf.
Quality risk management.

Equipment

- GC-MS GC-FID
- HPLC
- Ion chromatography
- UV-visible spectrophotometer
- IR spectrophotometer
- Particle size distribution analyzer
- Thermal analyzer (DTG,DSC)
- ICP-OES
- Karl fisher moisture meter
- pH meter/Ion meter/DO meter
- Specific surface and porosity analyzer
- Viscometer
- Polarimeter
- Hazen color meter
- Microbial cooling incubator
- Electric balance
- Isothermal dryer / Vacuum dryer
- Melting-point apparatus
- Electric muffle furnace
- Magnetic stirrer
- Centrifugal separator
- Vibrating screen, standard sieve
- Potentiometric titrator
- Ultrapure water (production) system
- Light microscope, polarizing microscope, solid microscope
